EasyHeat SR Trace™ Cable for Snow, Ice, and Freeze Protection

EasyHeat™ SR Trace™ cable is a self-regulating heating cable that automatically varies its heat output as the surrounding temperature changes.

Pipe Freeze Protection and Temperature Maintenance

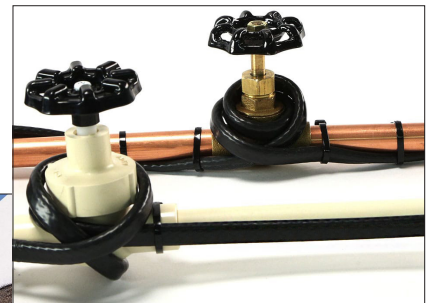

Provides maximum freeze protection for pipe lines and vessels. Ideal for use on commercial metal or plastic water supply and drain pipes subject to freezing, liquids piped during processing that require constant temperatures, and freeze protection for branch sprinkler systems.

Roof and Gutter De-Icing

Prevents costly damage to roofs caused by ice formation and snow accumulation in gutters, downspouts, and roof valleys. Suitable for use on asphalt or wood shingles, metal roofing, or "membrane" type roofing and downspouts that freeze and clog.
